

# DARK NIGHTS

## 2nd International Meeting: 3 Days Against Techno-Sciences Italy, 24-25-26 July 2020

This year again, we are proposing an informal, convivial and international opportunity for discussion and reflection among individuals and organisations engaged in building an analysis and a critique of what we may call the technoworld.

A world which is going through an epoch-making paradigm shift, where all bodies and our very experience have become one of the most important new raw materials.

Engineering of the living and digital control are increasingly replacing a large part of the previous market of commodities, which are becoming obsolete. On a planet which has been plundered well beyond its biological limits, the re-designing through synthetic biology and artificial reproduction in a eugenic key of human beings and their management represents the new path forward. This of course for those who will be included in the new power arrangement, for the others no plans have emerged, or perhaps the fact that they have not been presented is already an answer in itself, they will certainly not be satisfied with merely marginalising a part of the world.

For those who ask where the current system, based on systematic exploitation of the planet, can find a way to reorganise itself, incorporating into its discourse the farce of sustainability, the answer lies in taking over human beings themselves: managed, influenced and addressed in their behaviour so that they themselves produce processes which can turn them into commodities. This is the true essence of green and sustainable policies to save the planet from so many catastrophes, of which climate catastrophe is only a part. Human beings who will soon be genetically edited in a process of ongoing perfectibility, where the body will be seen as a limit to be overcome,

## RESIST THE FOURTH INDUSTRIAL REPRESSION!

The First Industrial Repression saw us thrown off the land, forced into crowded towns and cities, used as human fodder for the dark satanic mills of the new steam-powered capitalist world.

The Second Industrial Repression electrified the rule of The Machine. New generations were born who had never tasted freedom. Their lives and their thinking were increasingly dominated by the rhythms of industrial mass production.

The Third Industrial Repression heralded the arrival of computers and robots. Human beings were now expected to meekly conform to these automated norms and functions.

And now we face the onset of the Fourth Industrial Repression (4IR), the most deadly repression of them all...

The 4IR wants to own, control and profit from everything that exists in this world.

Its Internet of Things aims to create a matrix of total connectivity, of which it is the owner.

You, your home, your family, your friends, your relationships and your activities will all belong to the 4IR.

Its technocrats regard you as nothing more than another piece of disposable fleshware, one unit among millions, just another figure on its global balance sheet of exploitation.

The 4IR will track you and always know where you are, whom you are with, what you are doing.

It demands your total obedience. You can have no values, ideals or dreams of your own, only the ones authorised by the system.

Disobedient units are unproductive units.

The 4IR will know how to spot you, if you even so much as consider stepping out of line. Its predictive policing will quickly identify you as an anti-social element, a pre-criminal, a thought criminal.

It will send out its robots and its drones to neutralise you and protect the safe functioning of the matrix.

Digital identity systems. Militarised 5G. Neuro-technological brain enhancements. Genetic editing.

Cybersecurity Macht Frei!

*...continued next page*

The 4IR will not tolerate any irresponsible words or behaviour that present a threat to health and safety, to law and order, to resilience and prosperity.

Submission. Sycophancy. Slavery. We're all in it together, citizen!

The 4IR wants to scare us into its devouring jaws by pointing to impending disaster and claiming that nobody can save us but itself.

It shows us the misery and disease inflicted by the First, Second and Third Industrial Repressions and insists that the "solution" is a fourth dose of the same deadly industrial poison.

The intelligence of the 4IR is entirely artificial and its dead robot brain cannot smell what we smell, feel what we feel, love what we love.

It coldly ignores the timeless and vital value of people, animals, trees, plants and the whole organic reality of which these form part.

Instead it sees just raw material for its own profit.

It thirsts above all for data, endless floods of data to be collected, processed, sold and transformed into the wealth which buys its total control.

The Fourth Industrial Repression wants to replace everything true and authentic with its replicas, with a reality not so much virtual as entirely fake.

And yet its forked robotic tongue tells us that this phoney reality is in fact an "enhanced" or "augmented" one.

The 4IR wants to abolish the lives we have known. It wants to microchip us, lock us up in little cages, and force-feed us chemical food substitutes, laced with feel-good soma.

It cannot tolerate the idea that we might enjoy anything for free, such as sunshine, fresh air and the wild outdoors.

It craves a total monopoly of our experience. Cut off from the real world, from authenticity and liberty, we will have no choice but to buy and consume the poisonous ersatz reality it has carefully manufactured.

The 4IR, like all the other repressions before it, is built on our separation from one another, the destruction of our communities and the undermining of our solidarities.

"Social distancing" is the prerequisite for its seizure of complete power.

The 4IR wants us all to be on our own, online and in line.

The 4IR empties everything of meaning, particularly words. It says "sustainable" when it means ecocidal. It says "development" when it means destruction. It says "basic universal income" when it means slavery.

When the 4IR talks about "social impact investing" it really means it wants to turn human beings into lucrative investment opportunities.

Human capital. Human cattle.

When the 4IR talks about "a new deal for nature" it really means it wants to privatise the whole living world so as to make the billionaire class even richer than it already is.

When the 4IR demands "biosecurity", it means the security of its own systems of control against the threat from biological reality. From nature, from life, from us!

The 4IR thinks it is so smart. Its glossy propaganda promises us smart mobility in a smart economy, smart living and smart governance for the smart people of tomorrow.

The smart money is on the 4IR project. The smart money of the smart-arse smart set. Smart is the new smug.

The 4IR employs huge armies of professional liars and gullible fools to spread its propaganda and scream abuse at all who dare challenge its fearmongering falsehoods.

The 4IR is a death cult which dreams of wiping out everything that is natural, everything that is wild, everything that is free.

**Resist the Fourth Industrial Repression!**

**Fight the 4IR!**

where what is human will be considered an error, and must therefore continuously adapt to a machine world. A techno-scientific adaptability which will become the only possibility. We can now see how the cybernetic paradigm, according to which "the environment we live in has always been so radically modified that today we are forced to modify ourselves", takes a material and dramatic shape.

.. One of the main motors of this process is so-called artificial intelligence, increasingly pervasive, which does not impose its will by force, but is moving into every sphere of our existence, without giving us time to understand where and when this process began, and especially makes it superfluous or impossible to understand its more profound processes.

In these months, we have been seeing how quickly the 5G network is being launched in the world, and how this merely represents the beginning of the overwhelming flow of the internet of commodified bodies. We have also seen in China the management and control of millions of people through the 5G network and other surveillance technologies, in order to handle the quickly spreading Coronavirus contagion. Control and management on such a vast scale has never before been seen or attempted. An experiment which closely involves the international scientific milieu, the one that wears a white smock over camouflage: never has such a huge laboratory been thought of before, and the old form of totalitarianism, in a large part of the world, is fading off to make way to soft control and management of bodies, more effective however than repression and barbed wire.

As supporters of artificial intelligence and their transhumanist fans have repeatedly announced, the real strength and power of these technologies lies in the fact that they intervene in dealing with the new and most critical challenges the planet will be facing in the near future. We have become used to war as a model for reinforcing power and creating and managing new markets. Today, there is also something new: a cybernetic and transhumanist paradigm which expresses itself through algorithms, often leaving it to these to solve problems, something which is blended in the lab with surprising efficiency, where apps and prescriptions dressed up as

# THREE DAYS AGAINST TECHNO-SCIENCES <sup>2° international meeting</sup>

24-25-26 July 2020 - At Altradimora, strada Caranzano 72, Alessandria (AL), Italy

## FRIDAY 24TH

1 p.m. lunch  
3 p.m. Presentation of the meeting  
3.30 p.m. **VIRUS AND TECHNICAL TRANSFIGURATION OF THE WORLD - A CRITICAL VIEW TO FIND OUR BEARINGS IN THE PANDEMIC TIDE**

Showing of the emergency, astutely intertwined with the processes of technical reconfiguration of society, has quickly broken down and recomposed what is "normal". Memory of the world before is archaeology by now. And the thrust is towards a microscopically coded existence of numbered bodies, made transparent by the technomedia dimension.

What seemed at first to be a brief moment, soon turned out to be the opposite: the well calculated management of an emergency, with an outcome which was not something utterly new: rather, it was the result of long term processes.

Unrelenting capitalist production and the irreversible a saults on the Earth have thrust us into the toxic world we find ourselves in today, suffocated by a medical spirit which threatens to disinfest even our imagination.

In a society where memory is short, instantaneous, we need to analyse the present we are living through, and how there is no going back in processes where we risk loss and forgetfulness.

Silencing the technocrats and their cheerful announcements, for the oncoming artificial world.

**Nella (Bergamo - Italy)**  
8 p.m. dinner

## SATURDAY 25TH

8 a.m. breakfast  
9 - 10 **MANUFACTURING CHILDREN**

In the *longue durée* of capitalism, children have initially been treated as pure workforce, "produced" by women who by religion and law had to undergo coitus and rear the ever growing new generations of workers, until the moment when, gaining emancipation from the institution of the family, women could control their fertility. This change, and the increasing infertility due to industrial pollution of the environment, is at the root of the success of new markets in offspring. In this phase of capitalism, children have started to become a commodity to be commissioned, purchased, made to order, modifiable by cross-sex hormones if their behavior does not conform to their assigned gender. My contribution will highlight the interplay between laws (in particular "bioethical laws") and the diffusion of these markets in children, reporting data and trends of the manufacturing of children.

**Daniela Danna (Lecce - Italy)**  
10.00-11.00 **THE TRANSHUMANIST VISION TAKES SHAPE HOW HUMAN REPRODUCTION TURNS INTO PRODUCTION OF THE LIVING**

Transhumanism is the ideology of the convergence of biotechnologies, nanotechnologies, IT science, neurosciences. It is a world view which leads to an ontological and anthropological transformation of what is human; to erosion, uprooting and sterilisation of the capacity for awareness and resistance.

The human being of transhumanism is a biomedicalised human being, with a single, totalitarian dimension, where what is human is seen as the *mistake*, where everything has to suit criteria of ongoing perfectibility, so as to constantly adapt to a machine/world. Medically assisted procreation (MAP) are the path to transhumanism, after girls were edited in China, legalization of "MAP for everybody" - provided for by the recent revision of France's bioethics law - is another step with no way back.

This step will start with a plastic tube for insemination, and will end up with genetic selection of embryos, after having extended the artificial reproduction of the human. Eugenics thus takes on a new face, freely accepted, desired, normalised and trivialised a new kind of power, gentle, soft and no longer coercive. The human being is the ultimate target of the cybernetic and transhumanist project: the synthetic era does not only imply a radical redesign of the world around us, it also means redesigning ourselves, a *non-life*.

**Silvia Guerini, Resistenze al nanomondo (Bergamo - Italy)**

There will follow a debate on both talks  
12.30 lunch

3 p.m. **THE PANCRATICON & THE SOCIETY OF CONSTRAINT**

«The society of control, we passed beyond it. The society of surveillance, we are in it. The society of constraint, we are entering it». This formula which *Pièces et main d'œuvre* has been repeating and developing in its texts since 2008, could, at that time, have seemed an outrageous linguistic pose of the kind widespread in anarchist and left-wing milieux. Today, anybody can clearly see how, in China and elsewhere, in a condition of pandemic or of climate chaos, technological means transform the policing of the population: not just keeping order, but in the original sense of the word, the «polycy», «the organisation of the city». «The rational organisation, as the dictionary puts it». The Pancraticon is the device of technical/totalitarian constraints aimed at «replacing the government of human beings with the administration of things» (Engel/s/ Saint-Simon). Both on a macro-social scale (world-machine, networks, communicating sensors, RFID, Big Data, Artificial Intelligence, etc.) and on a micro-social scale (man/machine, implants, cyborg, etc.).

**Pièces et main d'œuvre (Grenoble - France)**  
7.30 p.m. dinner

9 p.m. **DIGITAL FOR RECOLONIZERS: INSTITUTIONS, WESTERN GOVERNMENTS AND INDUSTRIALISTS RAIDING AFRICA**  
**Robin Delobel, CADTM Comité pour l'abolition des dettes illicites, Revue Kairos (Belgium)**

## SUNDAY 26TH

8 a.m. breakfast  
9 **HOW TO RESIST AT TIMES OF "HEALTH EMERGENCY"?**

None of what we have seen deployed during these months, in terms of surveillance technology, medical dictatorship, censorship of contrary voices, massive propaganda for a specific purpose and destruction of freedom in every context, should be seen as something "exceptional".

The infrastructure deployed by the State, but especially by international finance and multinational corporations working in the digital, biotech and pharmaceutical industries, was neither improvised nor created ad hoc. Everything was already in place, waiting for the right condition for its full use.

This condition was a global health scare. The situation around us, which has changed in every context, now more than ever, should drive us to seek new ways and strategies to continue developing critical thinking and building paths of struggle.

Forcefully emphasizing priorities of intervention, which drew the line along the direction which started with criticism of engineering and artificialising the living, and led to the man/machine of transhumanism.

It is only if we understand the radical transformations which are going on, and unveil the new *gentle*, soft power, that we can face the insidious framework around us.

**Introduction by Resistenze al nanomondo (Bergamo - Italy)**

This event is intended as an invitation to groups and individuals to discuss and share experiences of resistance, so they are not unprepared for the new challenges which the changing reality imposes on us.

12.30 lunch

All translations will be translated into English.

Directions:

By car: From Genoa on the motorway to Alessandria, take the exit at Ovada, drive towards Acqui Terme and then follow the signs for Rivalta Borzida. After driving through Trisobbio and Rivalta Borzida, follow the road to Cassine and drive on for two kilometres until you see the signs for Caranzano. From Milan, take the exit at Alessandria Sud and follow the signs for Acqui and Cassine, the crossing for Caranzano is after Cassine Same road from Turin.

By train:

We can pick you up at the station of Acqui Terme, but please email us as early as possible in advance, and do not schedule your arrival during the sessions.

All THREE DAYS:

POISON-FREE FOOD WHICH HAS NOT ABUSED OF ANIMALS (please make a donation to cover costs)  
EXHIBITS AND DISTRIBUTION OF INFORMATION MATERIAL: BRING BOOKS, MAGAZINES, TEXTS

Altradimora, the venue for the meeting, is a house with beds and you can put up a tent on the meadow in front of the house. Help us organise the meeting in the best way, passing this programme around as much as possible, and letting us know in advance whether you are coming.

**FOR INFORMATION AND CONTACT:**  
[www.resistenzeealnanomondo.org](http://www.resistenzeealnanomondo.org)  
[info@resistenzeealnanomondo.org](mailto:info@resistenzeealnanomondo.org)

suggestions sent by smartphone in China have turned millions of people into sanitary prison guards of themselves.

Around us, profound transformations need to be understood, the analyses we make with the usual interpretations are limited and reductive, they are not able to grasp today's transformations, power evolves and so must our analyses: this is the basis for undertaking and assigning priorities to fight for. How can one fight something one does not know? What one cannot understand? There are fundamental epochal shifts going on, shifts we need to understand. We have to see in which direction power is moving, before it fully implements its projects, so we do not come too late, and especially so they do not find us once again unprepared.

It is with this spirit that we are organising this year a second meeting, scheduled for the month of July, in order to involve organisations and individuals from various countries already engaged in a profound and clear analysis of the present, and actively involved in opposition to the developments of techno-sciences. An involvement which may break the glass

window of inevitability through which too many stare passively at the course of events. A meeting to reinforce critical thinking in discussion with other organisations and individuals, who may follow different paths, but share a common desire to understand what is going on around us.

We shall focus on smart cities, 5G networks, artificial intelligence, transhumanism, artificial reproduction of human beings, genetic engineering and redesigning of living beings through synthetic biology. ... Since this meeting is entirely self-organised and with very limited means, please help us spread this text wherever there may be listening ears and burning hearts, worried about the near future which is already our present.

**Collettivo Resistenze al Nanomondo**

For information and contact:

[www.resistenzeealnanomondo.org](http://www.resistenzeealnanomondo.org), [info@resistenzeealnanomondo.org](mailto:info@resistenzeealnanomondo.org)

... The meeting will take place at Altradimora, strada Caranzano 72, Alessandria (AL), Italy

Program:

# 5G Arson Sabotage, Conspiracy Theories and UK

According to corporate media another four Vodafone cell phone towers were torched in the 24 hours after the recent arson attacks targeting 5G infrastructure took place on April 2nd & 3rd. 3G and 4G towers were also part of those destroyed, although it's unclear if they were unintentionally sabotaged or not. Information about the attacks themselves has been hard to ascertain due to limited information being issued by the mass media and rapid censorship of corporate social media.

Since the first attacks last week, at least 20 attacks are reported to have taken place across the country and there are reports of engineers also being questioned, harassed and attacked by people worried about 5G. It is clear that whilst everywhere is in lockdown the continued expansion and roll-out of 5G has remained a priority. The UK State regime and communications corporations were forced to issue a statement describing the risks that 5G poses to human health to be "baseless" and blamed the harassment and attacks on "conspiracy theories". Social media corporation Facebook took down several pages dedicated to recording and apparently inciting the anti-5G attacks and also had their messaging app company WhatsApp limit the forwarding ability of messages. This is part of a cross-platform corporate attempt with Twitter, Google, Youtube etc to co-ordinate efforts together with the State to censor and track what they are describing as "misinformation" about the origins of Covid-19.

The most dominant of these unpermitted ideas being that 5G has a direct correlational relationship to the Coronavirus pandemic, in that 5G has a direct negative effect on humans leading to a weakening of the human nervous and immune system.

Whilst it has already been proven that air-pollution rates have a direct relationship with Covid-19 cases, and for decades the authorities also declared climate change to be a myth, we have to accept at face-value their claims, when even a small research of the background history of 5G reveals the facts.

Without 5G, the governments and

corporations of this planet cannot build their techno-prison-world to control us all. The 'internet of things', 'smart cities', dataveillance, autonomous robots, vehicles and drones, all these things all require the total dominance of the 5G technology. If you do not want that, then you have every reason to see this technology burned to the ground already.

Through focusing on the most outlandish, reactionary and fascist narratives that are supposedly behind the Coronavirus pandemic (whilst engaging in dark arts of their own), the UK regime tries to defend itself during a peak moment of critical infrastructure vulnerability and people's refusal to accept the real coup which has taken place.

What cannot be doubted is that other State and non-State actors continue to exploit the crisis to advance their own agenda through unconventional and quiet warfare. The entire world is at a war footing to fight each other and to repress their own people, massive troop and armour movements across all the major territories are reported, the plans of contingency are put in place and 2 billion people remain in lockdown.

This is the "conspiracy theory" - that the rich and the powerful connive with each other to achieve their own ends,- it has always been like this, and unless we do something about it, it will always be so.

## **All hail discordia.**

Postscript: According to corporate source dated May 6th, 77 mobile-phone towers have been sabotaged in UK since April. Engineers have also been attacked, with one stabbed and hospitalized according to the CEO of UK telecoms firm BT.

## CORPORATE ENEMIES LIST

The Earth is being destroyed, those who are destroying it have names and addresses.

### **Information on Facelift, Cherry picker company installing 5G infrastructure.**

Facelift provides cherry picker platforms to install and access the high infrastructure needed for 5G. Their large vehicles can be seen in cities and stand out. They are yellow and black with their logo prominent. Maybe you can find their vehicles at night or in the day.

Facelift (cherry picker company)
