

# UK ECO-ANARCHY

#0 - Spring 2019 - Notes for green resistance

*This is anarcho, earth and animal liberation news from UK. Designed to be printed, photocopied, passed on and fly-posted. Offline, subversive and free!*

**Enough of leaders in London or in EU or anywhere else! Enough of the raging fascist and democratic illusions alike and the racist swill bred by the capitalist classes, the Murdoch press and the far-right! Against the cult of Corbyn and the Labour Party! They want us divided, easy to control and never fighting back! There's an ecological collapse taking place, let's attack the rich and powerful who are responsible!**

Capitalism, in the form of the international financial and banking elites, are what direct and profit from the destruction of the planet and the degradation and impoverishment of people's lives. The entire techno-industrial system we live inside as prisoners is facing an uncertain future, along with most of the natural world. It's time to bring the whole machine down!

Life itself is now just a product, from the nano and biosciences, the information technology companies to the consumer spectacle and it's myriad of lifestyles for sale. In a world of devastating emptiness and where a species level extinction event is taking place, the miserable horror of daily life carries on regardless. We are anarchists and we fight for another world!

Now that the climate crisis becomes real, it's clear that governments, institutions and corporations have never been gatekeepers or defenders of the environment, and we have to take things into our own hands. But you don't need to be acting like some stereotype from the media to take action in defence of the Earth. You don't have to toe the line – hook, line and sinker, to any reformist activist group, so-called 'community campaign' or green-washed government initiative. You can plan and carry out your own actions and resistance in affinity groups and informal networks.

## News & Action

**17 Mar** - Two hunter's pheasant pens destroyed on a shooting estate in badger cull zone before the rearing season starts by Animal Liberation Front (ALF).

**15 Mar** - Near Bodmin, Cornwall, hundreds of pheasants in breeding pens are released by ALF in memory of slain anarchist comrade Anna Campbell.

**15 Mar** - Four people got arrested for blocking a road at the Youth Strike climate crisis demo in London.

**27 Feb** - In London nine Extinction Rebellion activists got arrested at a blockade of an international oil and gas industry conference.

**22 Feb** - Reclaim the Power eco-activists blockaded S.Lyon & Son Haulage company in Lincoln (LN6 5SA) who supply to the oil and gas industry. In Cheshire, activists entered SIBELCO quarry, scaling scaffolding at the quarry and holding a banner saying, 'Sibelco, Stop Supplying Oil + Gas Firms'. In Windsor, activists assembled a 4 metre high fracking rig to shut down Centrica's HQ, to protest the company's £100 million financing to fracking firm Cuadrilla.

In Bristol over 50 people attended an event outside a depot of energy company SSE. There were also demos in Leeds, Cardiff and Cambridge.

**14 Feb:** Valentine's Day anarchist anti-prison noise demo at HMP Bronzefield, London. In solidarity with over 500 women and youth inside and all those incarcerated in an oppressive and discriminatory society.

**13 Feb** - The Home Office is shut down in London by No Borders activists who superglue themselves to the doors and spray slogans.

**1 Feb** - A mistreated dog is rescued by the ALF in memory of Jill Philips who lost her life campaigning against live exports.

**31 Jan** - Eco-activists from Reclaim the Power and Fossil Free London infiltrate and disrupt an oil investment conference in East London.

If you're poor the options don't look promising. You're told its a choice between consuming or saving the planet – It's that black & white really? So it's really impossible to be proletarian and environmentally conscious? If we can't access the natural environment, we end up trampling each other in the rat race. The techno-industrial system is the machine which has totally polluted the world and has us as a cog. It is a systemic problem, not an individual one. This capitalist roulette wheel which dominates the lives of countless billions of people through market speculation of prices of essential goods and resources has to go if there is to be any chance of 'saving' the natural world, which is in imminent meltdown.

They like you to stick to the footpaths so you can't see what they are doing. But behind fences, closed off by wires, walls and security guards, the businesses which are looting this planet are working. Let's try to stop them!

*You can't live on a dead planet!*
