

STORMS AND LIGHTNING

An overview of attacks
and sabotage in Greece
from January to June 2023

Athens just as other cities in Greece were never, are not, and never will be at peace as long as the struggle continues.

We want everything, but we don't desire anything. Nothing that we take with violence will quench our thirst. Only destruction will, only the possibility that we reach a point where we will not await anything and anything could happen.

To embrace dignity.

Nothing is over, everything continues...

3/1/23 Athens, Expropriation in a supermarket in Ilisia by Anarchists

Expropriation is the principle against conformity and submission.

We call for the immediate multiplication of similar actions in all cities

During the action, thousands of flyers were thrown with slogans such as:

"Attack on supermarkets, refusal of payment, war on the bosses' war"

"Destitution is the shopping basket, violence to the violence of capitalism"

"Precision is theft and class violence, everything for everyone"

"We don't just want the basket, we want the whole supermarket".

"Living on benefits, surviving on installments, conflicts, strikes, expropriations"

We reserve the right.

Athens 8/1/23 As a minimal sign of solidarity with comrade Thanos Chatziangelou and the rest of the hunger strikers, on 27/12/22 we chose to attack by breaking the facade and throwing paint at the offices of the New Democracy political party in Koukaki, which as government is applying the doctrine of zero tolerance, at least against those who do not enjoy its favours.

Athens: 27/2/23 Taking responsibility for attacks against fascists.

For our part, the anti-fascist world of struggle must raise a real blockade on the fascists, as it did in the past. Every day, with methodology and multiform action, to crush the nationalist paramilitary groups in the neighbourhoods, workplaces, schools, universities, stadiums and wherever else they attempt to raise their heads. We must not leave an inch to the fascists.

Again, and for as many times as it takes. At the same time, understanding fascism as something not detached from the dominant world of power, to strengthen the struggles against the State, capital, patriarchy, against the system that gives birth to fascists and arms their knives. We call on the people of the struggle to multiply the hostilities against the enemies of freedom.

Athens: 28/2/23 INCENDIARY ATTACK ON THE HOUSE OF RETIRED COPS.

The reason for this attack was the State murder of Kostas Fragoulis by the uniformed garbage of the DIAS cops team. Once again, the agents of the State apparatus murder in cold blood, but this time, as last year with Nikos Sabanis, race became the main issue in the political and social arena. As anarchists we do not need to analyse our position, it is clear.

But we ought to recall that this is not a random incident but a manifestation of the wider war that is being waged doggedly by the State and capitalism against the oppressed of this world and especially against those who dare to question their sovereignty. We are taking a stand in this war and declare that we will walk through your homes and over your dead bodies.

Strength and solidarity to comrade Alfredo Cospito who is on hunger strike and the Italian state chooses to murder him.

Solidarity to all political prisoners.

Patras- Taking responsibility for the burning of a vehicle of AB Vassilopoulos in solidarity with the anarchist G. Michailidis

We take responsibility for the burning of a vehicle of AB Vassilopoulos, (supermarket chain) a gesture of solidarity with the anarchist comrade G. Michailidis, who has been on hunger strike since 12/5/23 and thirst since 9/6/23 demanding his release from prison, once again putting his body as a barrier to State revenge.

We attacked AB Vassilopoulos, a company-pillar of capital's attack resulting in poverty, low quality and the plundering of our lives becoming more and more unbearable every day.

Because freedom will blossom on the wreckage of the last prison that will come with the elimination of exploitation, State/capitalist barbarism, the destruction of the natural world, with the building of a world of freedom, equality, solidarity.

For this reason we set fire to a KONE vehicle in the area of Kaisariani at dawn on 3/6 and a vehicle of ESA security solutions in Kypseli at dawn on 6/6.

LIVADEIA-ELIKONAS, : WIND TURBINE SABOTAGE vol 1

21/1/23 In recent years we have seen an extreme attack on the environment by the State and capital with the installation of wind turbines, Eubeia and Bioteia (Central Greece. Its capital is Livadeia, and its largest city is Thebes.) being prime examples, with more than 50% of the wind turbines already installed nationwide.

Specifically in Elikonas, almost all the peaks are planned to be destroyed, including archaeological sites, while the electricity prices (the energy providers are often the same as the ones who install the wind turbines) have gone red due to the energy tariff. So we decided to make a symbolic gesture and drop the wind mast (which measures the wind and then the installation of the wind turbines) on the peak of Megali Loutsas in Elikonas.

WIND TURBINE SABOTAGE AGAINST THE PLUNDER OF NATURE

30/5/23, Continuing the actions against the installation of wind turbines that overwhelm Helicon, we decided to shoot down the wind tower (measures the wind before the wind turbines are installed) on the top of Tsiveris (1562m). This peak is steep, very steep and rocky, which will lead to its flattening. Finally, it is worth noting that in Tsiveri there live free herds of wild goats that we met during our ascent.

Athens, Kaisarian area : coordinated attacks on windows and doors of the Citizens advice office of the state and the ELTA (post offices).

On Saturday 27 May, at 1am, we attacked the Citizens advice office of the state and the ELTA (post offices) in Kaisariani area at the same time, destroying their windows and doors.

We carried out this action in solidarity with the anarchist hunger striker from 12/5/23 Giannis Michailidis. Our comrade is suffering at the hands of the state because of his ideas and action, and has been subjected to multiple mockeries by the bureaucratic apparatus. That is why we too have chosen two cogs of this mechanism as targets.

Athens: Expropriation of Supermarket by Anarchists

On Wednesday 5/4/23 we chose to expropriate products from the AB Vassilopoulos chain in the area of Zografou.

Capitalism's ease in creating ephemeral consumption needs is one reason it can be assimilated into any social condition, which is what makes it so durable. However, although this condition is often found in our daily lives, we cannot ignore the fact that some of our needs are pushed aside as we are forced to feed ourselves with low quality products while our class opponents have access to better products, which has a direct impact on our overall quality of life. Part of the expropriated products were given to structures of the antagonist movement as well as to ourselves. With only our hands and a rudimentary organization, we filled our bags with our needs that will never go back. In turn we call for the immediate spreading and reproduction of such actions everywhere.

May 10, we visited the Volkswagen dealership on Alexandras Avenue. Our intervention resulted in the destruction of several new electric vehicles and the destruction of the facade of the delegation, without endangering passers-by or residents of the area. We consider as a part of anarchy the recognition of those who profit from oppression, misery and exploitation and our debt to return to them the violence they cause.
